Title of the Webinar : “Gravity Based Power Generator”

Date : 19.05.2021

Resource Person : Mr.S.R.Karthikeyan, AP/EEE, KCE

Beneficiaries : EEE Faculty Members- 8

On behalf of Department of EEE, IEEE Branch has organized Internal Seminar on “Gravity Based Power Generator” for faculty members, Department of EEE on 19.04.2021. The main objective of the internal seminar is to provide exposure to various research areas to our faculty members.

During the session the resource person discussed merits and demerits of various renewable energies. He explained the importance of gravity based power generator. He pointed out the recent research about gravity based power generation in the name of perpetual motion. He discussed about statistics of power sector in India. In his presentation he mentioned that 53% of Coal and 24.5% of renewable energy sources used for power generation as per the record of ministry of power, government of India as on 14.03.2021.

In order to increase the percentage of renewable energy sources for power generation, focus gravity power generation. Because Gravitational energy is uniform, continuous and independent of atmospheric conditions and geometrical areas.

He mentioned the gravity value of various planets in solar system:

Planet	Acceleration due to gravity, “g” (m/s²)
Mercury	3.59
Venus	8.87
Earth	9.81
Moon	1.62
Mars	3.77
Jupiter	25.95
Saturn	11.08
Uranus	10.67
Neptune	14.07
Pluto	0.42

The first screenshot shows a slide titled "HISTORY OF PERPETUAL MOTION (Cont)". It contains two bullet points: one about Taiwanese scientists Chou Chia Wang and Yuh-siang Wang in 2009, and another about Russian scientist Mikhail Dmitriev in January 2011. Below the text are two images: a wooden device labeled "Device of Villard de Bouches" and a mechanical drawing of an overbalanced wheel.

The second screenshot shows a slide titled "Gravity of various Planet". It features a table with two columns: "Planet" and "Acceleration due to gravity, 'g' [m/s²]". The table lists planets and their corresponding acceleration values.

Planet	Acceleration due to gravity, "g" [m/s ²]
Mercury	3.59
Venus	8.87
Earth	9.81
Mars	1.62
Jupiter	25.95
Saturn	11.68
Uranus	10.67
Neptune	14.07
Pluto	0.62

Below the table, it notes that Jupiter has the highest value of gravity and Pluto has the least.

The third screenshot shows a slide titled "Drawbacks in Utilizing Renewable Energy Sources". It lists three sources: Solar, Wind, and Hydro. Under each source, specific drawbacks are listed, such as "Solar doesn't work at night" or "Wind - Unpredictable". A note at the bottom states that these sources depend on atmospheric conditions.

INTERNAL STAFF SEMINAR – REPORT

02/03/2021

Background & Objective

Department of Civil Engineering had organized an Internal Seminar for the Department staff members for accessing online journals. The purpose of this seminar is to equip the faculty in new techniques through accessing online journals (SPRINGER journal).

Seminar Session

A Seminar was held in the Department of Civil Engineering on 2nd March, 2021 at 12:45PM. The seminar was presided over by **Ms.R.Revathi, HoD.**, Department of Civil Engineering. All the faculties were present in the seminar. **Ms.D.Shrividhya/AP** delivered her seminar talk on **“Construction and Demolition Waste Management”- A REVIEW”**

Seminar talk by Ms..D.Shrividhya/AP

Theme: sustainable C&D waste management is becoming increasingly essential to protect public health and natural ecosystems. This paper proposes a conceptual C&D waste management framework to maximize the 3R (reduce, reuse and recycle) and minimize the disposal of

construction waste by implementing sustainable and comprehensive strategy throughout the lifecycle of construction. In addition, a life cycle based C&D waste sustainability index is developed. This approach can be used to make decisions related to selection of material, sorting, recycle/reuse and treatment or disposal options for C&D waste. waste management systems include waste avoidance and minimization through recycling/reusing, waste to energy options (where possible) and safe disposal and discharge.

Outcome :

The Seminar clearly highlighted the reduction and management strategies to minimize the construction and demolition waste. Staff Members also got an idea about the usage of recycled wastes in construction industry like recycled aggregate, timber, bricks, glass plastic, pipes dredging, paints and varnishes etc., This seminar proves to be very effective in such a way that, it highlighted the lifecycle assessment approach. Also this seminar provides the wide scope for managing the construction and demolition wastes into sustainable usage of resources. Finally, discussions were made among faculty members in various re-utilization of recycled construction and demolition wastes again in a construction. Staff members shared their views regarding seminar and gave their valuable feedback.

Seminar talk by Mr.V.Ishwarya /AP

The themes discussed were: Smart Waste Bin Monitoring and MSW for Smart Cities.

The significant contribution of this paper:

- i. The proposed model will provide efficient, real-time and IoT-based garbage collection solutions to municipal solid waste management.
- ii. It will improve environmental quality leading to reduce health issues by delivering scheduled emergency alerts.

- v. It will reduce the man power effort of municipal management by providing effective usage of garbage bins.

Outcome

The Seminar clearly highlighted the smart techniques and method for waste collection, transporting and disposal. Staff Members also got an idea in waste collected through IoT-based system and more effective as compared to traditional methods and in terms of waste-truck route optimization and cost reduction of the system. Based on IoT, the waste will be collected on time that reduces the pollution ratio in the environment in order to save people from many diseases. INTERNAL STAFF SEMINAR – REPORT

11/02/2021

Background & Objective

Department of Civil Engineering had organized an Internal Seminar for the Department staff members for accessing online journals (MAT). The purpose of this seminar is to equip the faculty in new techniques through accessing online journals.

Seminar Session

A Seminar was held in the Department of Civil Engineering on 11th February, 2021 at 11:30AM. The seminar was presided over by **Ms.R.Revathi, HoD**, Department of Civil Engineering **Mr.K.Ranjith /AP** delivered his seminar talk on "**Analysis of plain Concrete pavement in ANSYS and "Analysis of compressive strength of concrete using different Sulphonated Naphthalene Polymer based admixtures"**."

Seminar talk by Mr.K.Ranjith /AP

The themes discussed were: ANSYS, Super plasticizers, ready mix concrete, pre-stressed concrete.. pumped Concrete Sulfonated Naphthalene Polymer base.

The significant points of the paper:

- From the paper it is very clear that the finite element modeling for concrete pavement is very essential. ANSYS 11.0 is very good tool and the results obtained are the contours of stress, strain and forces.
- The deformed shapes are also visible. The stresses and strains in terms of different colors are also visible.
- The test of compressive strength of concrete for SNP (Master Rheobuild 623) shows that, as the water cement ratio increases the strength of the concrete declines.
- Using this super plasticizer in concrete, the highest values are obtained for the lowest water cement ratio and this is about 4200 psi.
- The same thing is also happened for SNP (Con-Lub) and SNP (Master Rheobuild 1100) that when the water cement ratio increases the strength of concrete decreases.
- The highest value of compressive stress for SNP (Con-Lub) is obtained at 28 days for 0.30 w/c ratio is closer to 4400 psi and for SNP (Master Rheobuild 1100) the highest value is obtained at 28 days for 0.30 w/c ratio is closer to 4400 psi.

Outcome

The Seminar highlighted the new method to solve complex elasticity and structural analysis problems in civil and aeronautical engineering. The finite element method is a numerical procedure that can be applied to obtain approximate solutions to a variety of problems in engineering. There are many ways to reduce permeability of concrete. The most economical way is reducing the water / cement ratio. The results have shown substantial improvement in the properties of concrete after use of the admixtures. Finally, discussions were made among faculties on advanced techniques in ANSYS. Staff members shared their views in ANSYS software and shared their suggestions.

29/01/2021

Background & Objective

Department of Civil Engineering had organized an Internal Seminar for the Department staff members for accessing online journals. The purpose of this seminar is to equip the faculty in new techniques through accessing online journals (MAT journal).

Seminar Session

A Seminar was held in the Department of Civil Engineering on 29th January, 2021 at 01:00PM. The seminar was presided over by **Ms.R.Revathi, HoD.**, Department of Civil Engineering. All the faculties were present in the seminar. **Mr.K.Arun /AP** delivered his seminar talk on **“USE OF BAMBOO AS A CONSTRUCTION MATERIAL - A REVIEW”**

Seminar talk by Mr.K.Arun /AP

Theme: Researchers and architects are always looking for new materials for basic frameworks; utilizing bamboo as conceivable support has picked up fame. Giant bamboos are the largest members of the grass family. In bamboo, the intermodal regions of the stem are usually hollow and the vascular bundles in the cross section are scattered throughout the stem instead of in a

cylindrical arrangement. Bamboo includes some of the fastest growing plants in the world. Certain species of bamboo can grow 91cm within a 24 hour period. Bamboo culms are a cylindrical shell divided by solid transversal diaphragms at nodes and have some intriguing properties such as high strength in the direction parallel to the fibers, which run longitudinally along the length of the column, and low strength in a direction perpendicular to the fibers. Based on the different properties and characteristics of bamboo, it was concluded that Bamboo can potentially be used as substitute for steel reinforcement. Considering its credibility, there is a wide scope for designing multi story building using bamboo reinforcement in future.

Outcome :

The Seminar clearly highlighted the properties and characteristics of bamboo as an alternate material for building construction. Staff Members also got an idea about the usage of bamboo in construction industry like columns, beams, purlins, rafters & reapers, flooring, doors & windows, walls, ceiling, man-hole covers etc. This seminar proves to be effective in such a way that, it highlighted the potential replacement for steel reinforcement. Also this seminar provided the wide scope for designing multi story building using bamboo reinforcement in future, considering the credibility of bamboo. Finally, discussions were made among faculty members in various features of bamboo as a construction material. Staff members shared their views regarding seminar and gave their valuable feedback.

23/01/2021

Background & Objective

Department of Civil Engineering had organized an Internal staff Seminar for the staff members for accessing online journals (Springer). The purpose of this seminar is to equip the faculty in new techniques through accessing online journals.

Seminar Session

A Seminar was held in the Department of Civil Engineering on 23rd January, 2021 at 01:15PM. The seminar was presided over by **Ms.R.Revathi, HoD.**, Department of Civil Engineering. All the faculties were present in the seminar. **Mr.R.Sundharam/AP** delivered his seminar talk on **“SEISMIC PERFORMANCE OF EXISTING WATER TANK AFTER CONDITION RANKING USING NON-DESTRUCTIVE TESTING”**

Seminar talk by Mr.R.Sundharam /AP

The themes discussed were: Seismic diagnosis and seismic retrofit for the existing tanks. DER, i.e., degree (*D*), extent (*E*) and relevancy (*R*) rating technique was employed to find out the condition

index of the elevated service reservoir (ESR). The ranking assessment of the elevated service reservoir was carried out using different non-destructive tests (NDTs). Numerous techniques have been originated and applied to improve the seismic behavior of these structures. Among all the natural disasters, earthquakes, being the most destructive and affecting structures, have also created a need to raise the current safety levels in structures. As per the recommendations of the prevalent codes, several existing structures were analyzed, designed and detailed. To make existing weak structures safe against future natural forces and possible earthquakes, retrofitting is one of the best options. In this research work, retrofitting techniques used are diagonal braces as a retrofitting system, FRP as a newly emerging material, and damper as technology.

Outcome

The Seminar obviously underlined the seismic vulnerability of the existing structures and the assessment of the elevated service reservoirs using non-destructive tests. The merits and demerits of the structure under seismic activity were discussed. Also the DER rating techniques used to find out the condition ranking of ESR and safety evaluation for rehabilitation or reconstruction, increasing the base shear of the structures using bracing, damper and FRP were also presented. At the end of seminar, discussions were done among the faculty members in various retrofitting techniques for different structures. Staff members shared their views regarding seminar and gave their feedback.

12/01/2021

Background & Objective

Department of Civil Engineering had organized an Internal Seminar for the Department staff members for accessing online journals. The purpose of this seminar is to equip the faculty in new techniques through accessing online journals.

Seminar Session

A Seminar was held in the Department of Civil Engineering on 12th January, 2021 at 01:00PM. The seminar was presided over by **Ms.R.Revathi, HoD.**, Department of Civil Engineering. All the faculties were present in the seminar. **Ms.T.Bhuvaneswari/AP** delivered her seminar talk on “Experimental Verification of Modal Identification of a High-rise Building Using Independent Component Analysis”.

Seminar talk by Ms.T.Bhuvaneswari/AP

The themes discussed were: ICA method, a novel method for identification of the modal parameters from the decomposed modal responses, Blind Source Separation techniques, robust

mathematical model and so on. The study aims to experimentally validate the blind source separation using ICA method and propose a novel method for identification of the modal parameters from the decomposed modal responses. Based on the robust mathematical model, ICA can calculate the natural frequency and damping ratio effectively using the probability distribution function of the instantaneous natural frequency determined by Hilbert transform of the decomposed modal responses and the change in the output covariance. The mode shapes obtained by ICA method agree with those by the analytical and peak picking methods. Advantage of using ICA is verified by reversing the separate modes obtained by ICA. The restoring of the outcome of ICA results in the original output signal without any deterioration in the data quality

Outcome

The Seminar clearly highlighted the new techniques and method to validate the parameters. Staff Members also got an idea in the validity of the proposed method which paves the way for more effective output-only modal identification for assessment of existing steel-concrete buildings. The ICA and Hilbert transform-based scheme can identify explicitly modal parameters of existing buildings. Finally, discussions were made among faculties in various new techniques. Staff members share their views regarding seminar and gave their feedback.

Background & Objective

Outcome-based education (OBE), also known as standards-based education, is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational programme, each student should have achieved the goal. In order to strengthen OBE practice, it is necessary to amend Course Outcome (CO) and Programme outcome (PO).

Department of Electrical & Electronics Engineering Academic year 2020-21 (ODD) Internal staff Webinar Report – Google Classroom

Google classroom usage was discussed with the staff members of Department of Electrical & Electronics Engineering on 15/09/2020. Some of the salient features of Google Classroom were discussed in the meeting.

1. Google Classroom is easy to use. Compared to other LMS (Learning Management Systems) that have been popular over the past decade, Google Classroom is amazingly simple.

2. Google Classroom helps to communicate more efficiently. Enter the email addresses of the students just once, and classroom communication is done. Just by entering the student in the classroom, the teacher has an email group, a discussion group, and a Google Calendar automatically created. And it's easy to add and remove students from the class as necessary.
3. Google Classroom helps you to communicate more effectively. Probably more important than being easy to use and efficient, the communication tools are also very effective. Because it is all Cloud-based, there is no more "losing" of assignments by students. If a student is absent, communication is seamless. Just last month, Google Classroom added a parent notification feature to keep parents informed about what is going on in the "classroom."
4. Google Classroom is more cost-effective and better for the environment. If every student has a device that connects to the Internet already, every sheet of paper that we save only makes the school more efficient and more environmentally responsible.

About the Workshop - LATEX:

In KCE, department of Electronics and Communication Engineering, has organized a Spoken Tutorial Workshop for ECE faculty members in online mode on 29-04-2020. Totally 16 staff members have enthusiastically participated in this Workshop.

As a part of our IQAC activities, we have conducted the spoken tutorial workshop in the topic of **LATEX**.

This workshop aims to provide a comprehensive theoretical and hands on practical experience on LaTeX to the beginners.

LaTeX is a document preparation system for high-quality typesetting, which is preferably used for technical/scientific papers writing for journals by researchers, engineers and mathematicians at large.

The typesetting system offers programmable writing features and extensive facilities for automating most aspects of typesetting .

Some useful features of LaTeX are:

- ✓ Typesetting of journal articles, technical reports, thesis, books, and slide presentations.
- ✓ Control over large documents containing sectioning, cross-references, tables and figures.
- ✓ Typesetting of complex mathematical formulae.
- ✓ Advanced typesetting of mathematics with AMS-LaTeX.
- ✓ Automatic generation of table of contents, bibliographies and indexes.

The staff members enthusiastically attending the workshop on LATEX.

After attending the workshop the staff members had an idea about this **LATEX**. More videos on **LATEX** were given as softcopy to the staff members to prepare themselves and to attend the online Exam.

About the Workshop – e-SIM:

In KCE, department of Electronics and Communication Engineering, has organized a Spoken Tutorial Workshop for ECE faculty members in online mode on 04-05-2020. Totally 16 staff members have enthusiastically participated in this Workshop.

As a part of our IQAC activities, we have conducted the spoken tutorial workshop in the topic of **e-SIM**.

Overview of e-SIM:

eSim (previously known as OScad / FreeEDA) is an open source EDA tool for circuit design, simulation, analysis and PCB design. It is an integrated tool built using open source software such as KiCad (<http://www.kicad-pcb.org>) and Ngspice (<http://ngspice.sourceforge.net/>). eSim is released under GPL.

eSim offers similar capabilities and ease of use as any equivalent proprietary software for schematic creation, simulation and PCB design, without having to pay a huge amount of money to procure licenses.

Hence it can be an affordable alternative to educational institutions and SMEs. It can serve as an alternative to commercially available/ licensed software tools like OrCAD, Xpedition and HSPICE.

The staff members enthusiastically attending the workshop.

After attending the workshop the staff members had an idea about this **e-Sim**. More videos on **e-Sim** were given as softcopy to the staff members to prepare themselves and to attend the online Exam.
