### TO WHOME IT MAY CONCERN

This is to certify that **Mr. E.Hariharan** has done his internship in Civil Engineers Association of Tamil Nadu, Thanjavur from 17 August 2020 to 28 December 2020.

He has worked on a project titled Web Designing and Development. This project was aimed to Develop E-commerce based constructions products website for our association. As part of the project, He designed a website (<https://www.engineerstimes.com>) and managed to Maintain the entire website

During the internship he demonstrated good Development skills with a self-motivated attitude to learn new things. His performance exceeded expectations and was able to complete the project successfully on time.

We wish him all the best for his future endeavors.

Warm Regards,  
E.Hariharan

## Certificate of Training

**DHARSINI BASKARAN,**

student of Kings college of Engineering, has successfully completed a six weeks online training on **Machine Learning**. The training consisted of Introduction to Machine Learning, Data, Introduction to Python, Data Exploration and Pre-processing, Linear Regression, Introduction to Dimensionality Reduction, Logistic Regression, Decision Tree, Ensemble Models and Clustering (Unsupervised Learning) modules. In the final assessment, DHARSINI scored 80% marks. We wish DHARSINI all the best for the future.

### CERTIFICATE FOR INTERNSHIP

TO WHOMSOEVER IT MAY CONCERN

This is to Certify that NANDHINI, S (821117106023) student of **KINGS COLLEGE OF ENGINEERING, Branch: 01:1 Electronics and Communication Engineering** has successfully completed our month (from 05 / 10 / 2020 to 05 / 11 / 2020) temporary program at **M/s. JK POWER CONTROLS**.

During the internship NANDHINI she closely worked as per part of Fabrication, BOM preparation and Shop floor assembly for 3 V switchgear panels like PVC, MCC, PLC Control Panel and APTC etc....

She demonstrated Assembly of control and power components, Wiring, Bending and Dressing of Control and power cables to understand the BOM preparation without missing any line items required for the concern panels.

We wish her all the best for the future.

ISSUED DATE: 5<sup>th</sup> NOV 2020

### PROJECT FIELD WORK CERTIFICATES

#### CERTIFICATE OF FIELD VISIT (To whomsoever it may concern)

This is to certify that Ms. Hemamalini.S, Rajalakshmi.K and Veeralakshmi.M are from 'Kings college of Engineering' visited our South Police station, Thanjavur on 01.03.2021 & 02.03.2021, discussed on women's safety and learned about Kavalan SOS app by Tamil Nadu government for the purpose of project in the title of "REAL TIME SAFETY SYSTEM FOR WOMEN USING GSM". We appreciate them to finish this project with a successful manner.

INSPECTOR OF POLICE  
 Town South Police Station  
 THANJAVUR, 613 002

#### CERTIFICATE OF FIELD VISIT

(To whomsoever it may concern)

This is to certify that Mr. MELVIN CHARLES.B, SATHYA.V and SURYA.G are from 'Kings college of Engineering' visited our Taluk police station, Thanjavur on 26.03.2021, discussed on problems faced by Border security force for the purpose of project in the title of "DESIGN AND IMPLEMENTATION OF BORDER SECURITY SYSTEM IN MILITARY FIELD". We appreciate them to finish this project with a successful manner.

Inspector of Police  
 Thanjavur Taluk Circle  
 Thanjavur - 613 021

#### CERTIFICATE OF FIELD VISIT (To whomsoever it may concern)

This is to Certify that Mr. SIVAKUMAR.R, YUVANKISHORE.M.A and VIGNESHWARAN.M are from 'Kings College of Engineering' visited our hospital on 23.03.2021 and discuss various concepts about the wheel chair and also know about various difficulties in the manual wheel chair for the purpose of making their project in the titled "DESIGN OF AN INTELLIGENT WHEEL CHAIR SYSTEM USING ARDUINO". We appreciate them to finish this project with a successful manner.

Dr.S.BALASUNDARAM, M.B.B.S.  
 Regd No: 53527,  
 Medical Officer,  
 Government P.H.C,  
 NARAIKULAM PUTHUR,  
 Thanjavur Dt.

#### CERTIFICATE OF FIELD VISIT (To whomsoever it may concern)

The following students

Ezhilarasi.M.821117106009  
 Manushya.M.821117106020  
 Preethika.M.821117106027

Visited our hospital on 17.03.2021 and discussed about the various concepts related to covid-19 and also discussed about the problems faced by the nurses in hospitals for the purpose of making the project in the title "Implementation of assistive robot for patient monitoring". We appreciate them to finish this project with a successful manner.

Prof. Dr. M. Singaravelu,  
 M.B.B.S., M.D., M.Sc., M.A., M.Phil.,  
 Post A.U.C.C. of Pediatrics  
 Govt. Medical College, Thanjavur,  
 Thanjavur District, Tamil Nadu,  
 Page No. 8/18

Scanned with  
 CamScanner

#### CERTIFICATE FOR FIELD VISIT

TO WHOMSOEVER IT MAY CONCERN,

This is to certify that Ms. JAYABHARATHI.P, LINCY FREEDA.P, PRIYADHARSINI.R, ROCELLA.M are from Kings College of Engineering, visited our Nachiyar Suzuki showroom at Thanjavur on 05.03.2021 and 06.03.2021, discussed and learned about Endurance test of motorcycle for the purpose of the project in the title IIOT- BASED SMART CONTROL MODEL FOR MOTORCYCLE DURABILITY TEST.

MANAGER (Nachiyar Suzuki).

Scanned with  
 CamScanner

#### CERTIFICATE OF FIELD VISIT

(To whomsoever it may concern)

This is to Certify that Mr. VISHWANATH.R, SIVANANTHAM.Y and SARANKUMAR.R are from 'Kings College of Engineering' visited our residency on 23.03.2021 and discuss about various types of infections affected in this present situations including covid-19. They also know about the preventive measures taken to avoid spreading infections by the use of UV Rays. We hope that this information may help them to establish a project Titled by "UV TECHNOLOGY FOR DISINFECTING SURFACE". We appreciate their ideas and wish them to finish this project in a successful manner.

For nRoot Residency  
 Authorized Signatory.

## CERTIFICATE OF FIELD VISIT

To whomsoever it may concern

The following students

Harish.K.B-821117106008

Karnan.P-821117106018

Mohammed Jhasim.J-821117106022

Nithish Kumar.K-821117106025

Visited Railway station on 15.03.2021 and discussed about the various concepts related to fire detection and also discussed about the advance fire monitoring system for the purpose of making the project in the title "Advance Fire Detection system for Indian Railway". We appreciate them to finish this project with a successful manner.

For nRoot Consultancy

Authorised Signatory

Scanned with CamScanner

## CERTIFICATE OF FIELD VISIT

(To whomsoever it may concern)

This is certify that Ms. Nisha.T, Juliyat.J and Amirtha.V.G. are from 'Kings college of Engineering' visited our office in marungulam ,Thanjavur on 22.03.2021 to 23-03-2021 discussed on agriculture field and learned about future development on agriculture for the purpose of project in the title of "IOT BASED MULTIFUNCTIONAL AGRIBOT". We appreciate them to finish this project with a successful manner.

Horticulture Officer,  
State Horticulture Farm,  
Marungulam.

FIELD VISIT CERTIFICATE

Date: 11.03.21

TO WHOM SO EVER IT MAY CONCERN

This is to certify that Mr. S.Chitra Sri, S.Ramkumar, S.Karthikeyan their students of Kings College of Engineering, Palakkad, Thiruvannamalai, has visited our Company on 11.03.2021. V.G. ENTERPRISES always supporting their final year project. The students were interacted with our employees facilities and learned about the systems and technologies.

Name & Designation of the authority concerned with visit:

G. LAKSHMI KANTHAN  
PRIESTER

V.G. ENTERPRISES  
18, Balakrishna Nagar,  
Mannargudi, Tiruvannamalai,  
Tamil Nadu - 614 001.

KINGS COLLEGE OF ENGINEERING

FIELD VISIT REPORT

Project Title  
DESIGN OF AN INTELLIGENT WHEELCHAIR  
SYSTEM USING ARDUINO

R.SIVAKUMAR  
M.VIGNESHWARAN  
M.A.YUVANKISHORE

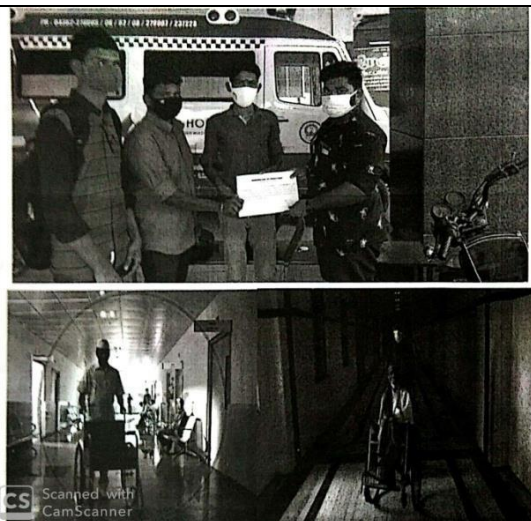

Guided by  
Mrs. D.VENNILA ,AP/ECE

We visited the M.R hospital in Thanjavur on 23/03/2021, the manager helped as to visit the hospital . The main objectives of the visit was to identify problems on wheelchair faced by patients in the hospital. Wheelchairs is used in hospital to move patients from one ward to another ward. A wheelchair is manually operated in the hospital designed primarily for use by an individual with a mobility disability for the main purpose of indoor, or outdoor, locomotion. wheelchair user are freedom to move around, allowing the user to access day to day physical activity. Specific objectives were as follows,

- To get information about the problems faced by wheelchair users in the hospital.
- To identify techniques and method used for patient in hospitals.
- To get information about the manually operated wheelchair user.

## FIELD VISIT REPORT

### Project Title

### IMPLEMENTATION OF ASSISTIVE ROBOT FOR PATIENT MONITORING

MEZHILARASI

M.MANUSHYA

M.PREETHIKA

Guided by

Mrs.R.PONNI, AP/ECE

CS Scanned with CamScanner

We visited the Medical college hospital in Thanjavur on 17/03/2021, the manager helped as to visit the hospital. The main objectives of the visit was to identify problems faced by nurses in hospital while treating the patient and how tackle challenges nurses facing in their day to day activities. The case history provided the information that the people who works close to affected patient also affected by disease. Many doctors, nurses, etc, were already affected by covid 19 and some lead to death. Specific objectives were as follows,

- To familiarize the particle work and evaluate our understanding of applying the theory.
- To get information about the problems faced by nurses in hospital.
- Using our knowledge to find strengths and weakness of nurses.
- To identify techniques and method used for patient in hospitals.

student of *Kings college of Engineering, punalkulam* has successfully completed the online internship training in web design from 15-06-20 to 29-06-20.

Resource person  
R. Logeswaran  
TCIL-IT, Pondicherry

## Internship Certificate

This is to certify that S. SANTHOSH KUMAR

student of *Kings college of Engineering, punalkulam* has successfully completed the online internship training in website Creation from 13 june 2020 to 27 june 2020.

RESOURCE PERSON  
SAMSON DE PAUL NOCHOLIN  
REDINGTON FOUNDATION, CHENNAI

Kaashiv

## Certificate OF COMPLETION

**J. Pragathi**

Kings college of engineering

Is presented with this certificate on successful completion of

**Web Designing Internship**

Under the guidelines and norms of the program structure conducted during the dates

**5 Days**

Attendee met all certification requirements and Successful performance on the required competence examination.

Certificate ID: KA-10tio Grade: A

Venkatesan Prabu J  
Microsoft MVP

The Certificate ID Can be Verified at [www.kaashiv.com/verify](http://www.kaashiv.com/verify)

## Internship Certificate

This is to certify that A. NANCY PRIYA

student of *Kings college of Engineering, punalkulam* has successfully completed the online internship training in website Creation from 13 june 2020 to 27 june 2020.

RESOURCE PERSON

### LIST OF STUDENTS UNDERGONE INHOUSE TRAINING

**Academic Year 2019-20**

S.No	STUDENT NAME	INHOUSE TRAINING DETAILS	DURATION
1.	AAKASH KRISHNA S	Golden Home, Chennai.	01.07.2020-30.07.2020
2.	ANTONY JOE N	KRB constructions, Thanjavur	01.07.2020-30.07.2020
3.	BAGAVATHI R	MMC Constructions, Thanjavur.	01.07.2020-30.07.2020
4.	BOOBALAN A	Outline Builders, Thanjavur	01.07.2020-30.07.2020
5.	GAYATHRI R	RK construction, Perambalur.	01.07.2020-30.07.2020
6.	GOPALAKRISHNAN M	Chentamizh Construction, Thanjavur	01.07.2020-30.07.2020
7.	GOWTHAMAN T	VK Builders, Chennai.	01.07.2020-30.07.2020
8.	GURU SWATHIK K.S	Brothers Construction, Budalur.	01.07.2020-30.07.2020
9.	JAYASURIYA K	KM Constructions, Pudukottai	01.07.2020-30.07.2020
10.	KAUSHIK SIVA V	Shri Hayagrivas construction, Thanjavur.	01.07.2020-30.07.2020
11.	MARIYA K	Jeevan Builders, Thanjavur	01.07.2020-30.07.2020
12.	NAVANEETHAKRISHNAN S	Karthik and Associates, Thanjavur	01.07.2020-30.07.2020
13.	NIVASH M	Shri Hayagrivas construction, Thanjavur.	01.07.2020-30.07.2020
14.	RANJITH K	Aram Constructions, Trichy	01.07.2020-15.08.2020
15.	SANTHOSH ANANDH D	PM creators and construction, Kumbakonam	01.07.2020-30.07.2020
16.	SHALINI S	KM Constructions, Pudukottai	01.07.2020-30.07.2020
17.	SILAMBARASAN P	JPS construction, Pudukottai.	01.07.2020-30.07.2020
18.	SOUNDARIYA M	C.G.Construction and Plotters, Thanjavur.	01.07.2020-10.08.2020
19.	SURENDAR K.L	KM Constructions, Pudukottai	01.07.2020-30.07.2020
20.	SURIYA PRASHATH K.S	Brothers Construction, Budalur.	01.07.2020-30.07.2020

**INDUSTRY VISIT REPORT**

Batch no :5

Team Members : Karthika.K,Nanthini.S,Priyanka.M,Gayathiri.R.R

Project Guide : Puvaneshwari.S

Project Title : IOT based Gas and fire accident avoider system for  
industries

Venue : Innovace Technologies  
KK Nagar,Trichy

Course :Internet of Things

Instructor Name: Priya.R

Date of visit : 09.12.2019 – 13.12.2019

Internet of Things (IOT) refers to connecting various physical devices and objects throughout the world via internet. IOT was generally defined as dynamic global network infrastructure with self-configuring capabilities based on standards and communication protocols.

The Internet of Things (IOT) is the network of physical objects,devices, instruments, vehicles, buildings and other items embedded with electronics, circuits ,software, sensors and network connectivity that enables these objects to collect and exchange data. The Internet of Things allows objects to be sensed and controlled remotely across existing network infrastructure, creating opportunities for more direct integration of the physical world into computer-based systems, and resulting in improved efficiency and accuracy.

H.O.D of Computer Science & Engineering  
KINGS COLLEGE OF ENGINEERING  
Pondicherry, Karaikal & Tuticorin (TN)  
Puducherry (IN) - 605 005

Physical and virtual things in an IOT have their own identities and attributes and are capable of using intelligent interfaces and being integrated as an information network. In easy terms IOT can be treated as a set of connected devices that are uniquely identifiable. The words "Internet" and "Things" mean an inter-connected world-wide network based on sensors, communication, networking, and information processing technologies, which might be the new version of information and communications technology (ICT). A number of technologies are involved in IOT, such as wireless sensor networks (WSNs), barcodes, intelligent sensing, RFID, NFCs, low energy wireless communications, cloud computing and so on.

The IOT allows you to automate and control the tasks that are done on a daily basis, avoiding human intervention. Machine-to-machine communication helps to maintain transparency in the processes. It also leads to uniformity in the tasks. It can also maintain the quality of service. We can also take necessary action in case of emergencies.

The most important role of IOT in Gas and fire safety is detecting disturbances. This process is a culmination of the functioning of different sensors which work together to trigger alarms and alerts.

## INDUSTRIAL VISIT REPORT

VENUE: SIEMENS CENTER OF EXCELLENCE IN MANUFACTURING, NIT TRICHY.

COURSE: INTERNET OF THINGS (IoT)

INSTRUCTOR: MR. V. SANGEETH KUMAR

TEAM MEMBERS: S.VINODHINI JOYCE, M.SUBHIKSHA, R.PAVITHRA

The Internet of Things, or IoT, is emerging as the next technology mega-trend, with repercussions across the business spectrum. By connecting to the Internet billions of everyday devices – ranging from fitness bracelets to industrial equipment – the IoT merges the physical and online worlds, opening up a host of new opportunities and challenges for companies, governments and consumers. A complete IoT system integrates four distinct components: sensors/devices, connectivity, data processing, and a user interface.

**Sensors/devices:** First, sensors or devices collect data from their environment. This could be as simple as a temperature reading or as complex as a full video feed. Multiple sensors can be bundled together or sensors can be part of a device that does more than just sense things. For example, your phone is a device that has multiple sensors (camera, accelerometer, GPS, etc), but your phone is not *just* a sensor. However, whether it's a standalone sensor or a full device, in this first step data is being collected from the environment by *something*.

**Connectivity:** Next, that data is sent to the cloud but it needs a way to get there! The sensors/devices can be connected to the cloud through a variety of methods including: cellular, satellite, Wi-Fi, Bluetooth, low-power wide-area networks (LPWAN), or connecting directly to the internet via Ethernet. Each option has tradeoffs between power consumption, range and bandwidth. Choosing which connectivity option is best comes down to the specific IoT application, but they all accomplish the same task: getting data to the cloud.

S  
18/12/19  
H.O.D of Computer Science & Engineering  
KINGS COLLEGE OF ENGINEERING  
Pondicherry, Gandhinagar (TN)  
Puducherry (IN) - 605 005

K. Sangeetha  
18/12/19

**Data processing:** Once the data gets to the cloud, software performs some kind of processing on it. This could be very simple, such as checking that the temperature reading is within an acceptable range. Or it could also be very complex, such as using computer vision on video to identify objects (such as intruders in your house). Here we use DATONIS cloud to perform the processing on it.

Datonis IoT platform is a highly scalable, cloud-based IoT platform that allows devices to securely connect and exchange information in real-time. Manage, control and upgrade your edge devices from the cloud. Analyze machine data in real-time and set alerts and notifications to know when faults occur. Interactively analyze your machine data at scale. Integrate your machine data with your enterprise systems using an open API.

**User interface:** Next, the information is made useful to the end-user in some way. This could be via an alert to the user (email, text, notification, etc). For example, a text alert when the temperature is too high in the company's cold storage. Also, a user might have an interface that allows them to proactively check in on the system. For example, a user might want to check the video feeds in their house via a phone app or a web browser.

However, it's not always a one-way street. Depending on the IoT application, the user may also be able to perform an action and affect the system. For example, the user might remotely adjust the temperature in the cold storage via an app on their phone. And some actions are performed automatically. Rather than waiting for you to adjust the temperature, the system could do it automatically via predefined rules. And rather than just call you to alert you of an intruder, the IoT system could also automatically notify relevant authorities.

These are the modules and measures we have learnt in this course. We used Datonis cloud platform to measure the real time metrics that was functioning in the several laboratories such as automation, process instrumentation, test & optimization etc.. This IoT implementation is been very useful for our project to implement in real time agriculture. IoT makes a better platform to be easily communicated with the farmers who face so many problems in their yielding crops.

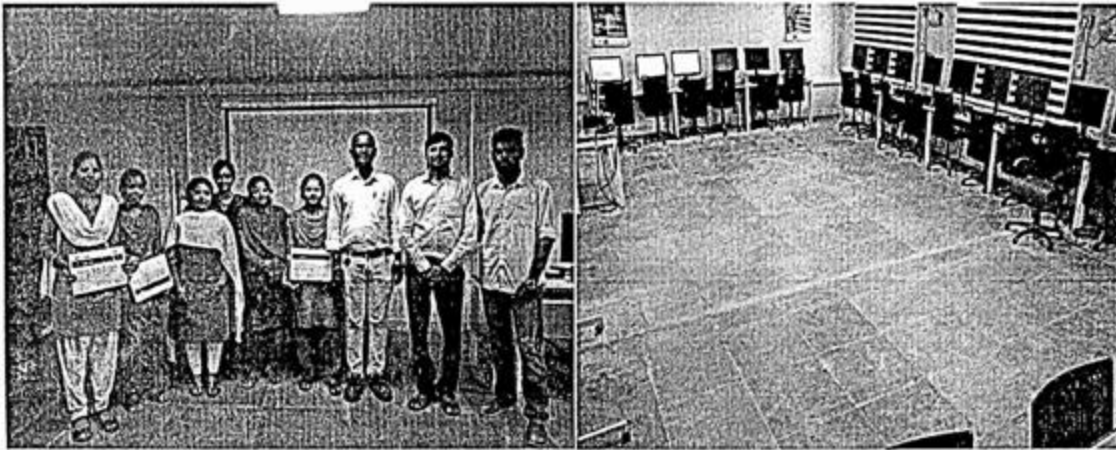

So this implementation will make our project to be even more innovative with the learning of the future world and control the measures which raises some issues in the environment especially in agricultural field.

## INDUSTRIAL VISIT

---

it is been burnt. For making the ashes not to fly it is been mixed with water. This water is been heated at required temperature and with the vapours produced in that process will be converted into electrical energy. The unwanted ashes which has been stayed in the process of heating will be evaporated in the chimney. This ashes will be attached with the magnetic power inbuilt in that chimneys.

By this way the air pollution is been detected and wastage of smokes will be reduced by this technique. These airs are harmful for the workers which can lead to diseases such as asthma, wizing. So to prevent it we have used IOT on our project.

This method is using how to prevent the asthma and learned what technique is used in sugar mill. By using this technique to implement my project to decrease the asthma deseases in my project.

**PROJECT GUIDE:** Ms.P.NALAYINI (AP/CSE)

P.NITHISH KUMAR ,K.THAYUMANAVAN,J.THOOYAVAN

Market Simplified is a Leader in crafting mobile solutions for financial services institutions across the globes .The company was found 2005.The move from just 'Connecting the Channels' to 'Engineering Experiences' is clearly becoming the way to the future. It specializes in making financial institutions fully mobile by developing rich, customized applications for the financial industry, natively built across multiple mobile OS. Its core proposition includes coverage across mobile, tablet devices, web, Internet TV and other systems to stay ahead of the technology evolution.

## **INTRODUCTION**

Network Access Control (NAC) is a computer networking solution that uses a set of protocols to define and implement a policy that describes how to secure access to network nodes by devices when they initially attempt to access the network. NAC might integrate the automatic remediation process (fixing non-compliant nodes before allowing access) into the network systems, allowing the network infrastructure such as routers, switches and firewalls to work together with back office servers and end user computing equipment to ensure the information system is operating securely before interoperability is allowed.

*K. S. S.*  
18/12/19

let's take the example of medical field industry they are divided the several section like scan departments, blood bank detail analysis, blood count lab, RI scan lab and x-ray sections and there lot of sections was involved. In that way we can introduce the NAC method basis which is said to be Network Access control, which can be used to handle multiple systems to monitor in single configured monitor.

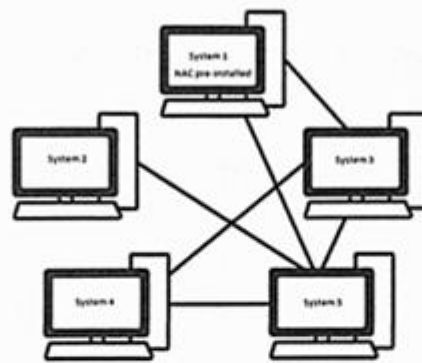

In NAC we can control the all department sections in every industries and it can be monitor by client server and unfortunately any problems occurred in in the different sections and the alert systems enabled in server sections to alert the users. This will be very useful for further upcoming industries. The main theme was u don't have to watch the all sections in different monitors. The NAC which helps to handle the all problems in single user (Client). This is the methodology of this project and it will be the next generation in upcoming industries.

ARCHITECTURE

## NAC:

When a computer connects to a computer network, it is not permitted to access anything unless it complies with a business defined policy; including anti-virus protection level, system update level and configuration. While the computer is being checked by a pre-installed software agent, it can only access resources that can remediate (resolve or update) any issues. Once the policy is met, the computer is able to access network resources and the Internet, within the policies defined by the NAC system. NAC is mainly used for endpoint health checks, but it is often tied to Role-based Access. Access to the network will be given according to the profile of the person and the results of a posture/health check. For example, in an enterprise the HR department could access only HR department files if both the role and the endpoint meets anti-virus minimums.

S. J. 18/12/19

H.O.D of Computer Science & Engineering  
KINGS COLLEGE OF ENGINEERING  
Pondicherry, Gandhinagar (TN)  
Puducherry (IN) - 605 006.

K. S. S. S.  
18/12/19

Network Access Control helps enterprises implement policies for controlling devices and user access to their networks. NAC can set policies for resource, role, device and location-based access and enforce security compliance with security and patch management policies, among other controls.

NAC is an effort to create order out of the chaos of connections from within and outside the organization. Personnel, customers, consultants, contractors and guests all need some level of access. In some cases, it is from within the campus and at other times access is remote. Adding to the complexity are bring your own device (BYOD) policies, the prevalence of smartphones and tablets, and the rise of the Internet of Things (IoT).

NAC was the highest IT security spending priority in e Security Planet's 2019 State of IT Security survey – and is also one of the technologies users have the most confidence in.

### MINIMUM CAPABILITIES:

- Dedicated policy management to define and administer security configuration requirements, and specify the access control actions for compliant and noncompliant endpoints
- Ability to conduct a security state baseline for any endpoint attempting to connect and determine the suitable level of access
- Access control so you can block, quarantine or grant varying degrees of access.
- The ability to manage guest access.
- A profiling engine to discover, identify and monitor endpoints
- Some method of easy integration with other security applications and components.

*K. S. 18/12/19*

## CONCLUSION :

With organizations now having to account for exponential growth of mobile devices accessing their networks and the security risks they bring, it is critical to have the tools that provide the visibility, access control, and compliance capabilities that are required to strengthen your network security infrastructure. A NAC system can deny network access to noncompliant devices, place them in a quarantined area, or give them only restricted access to computing resources, thus keeping insecure nodes from infecting the network. IoT devices, whether they be in manufacturing, healthcare, or other industries, are growing exponentially and serve as additional entry points for attackers to enter the network. NAC can reduce these risks in IoT devices by applying defined profiling and access policies for various device categories.

## INTRODUCTION:

A lot of developers prefer building the app from the ground up all by themselves, there are still mobile app development platforms like Shop gate and Good Barber that can be used to build a fully functional prototype, to begin with. This is the point where you start setting up developer accounts on app stores where you plan on releasing the app. However, before that, the mobile app development process further consists of multiple phases, as follows:

1. Alpha phase 2. Beta phase 3. Release phase

A successful launch does not imply that your app will see success on the whole. Post-launch monitoring, analytics, constantly updating the app for fixing bugs and crashes, social media listening, checking reviews and responding to them – all of these are important steps that follow through after the launch of an app.

## TOOLS:

Java, Eclipse platform, Android ADT and Android SDK are available from the most basic programming languages for mobile application development on Android operating system. These systems have a nice interface and smooth operation. These applications provide a great user experience. In addition to being popular with the Android operating system, applications based on the Android SDK are also attracting more attention. In this work, a number of tools were used in Eclipse when developing applications for Android. First, a number of tools were used in the Android SDK. After downloading and installing the SDK, these tools are accessed directly from the Eclipse IDE, through the ADT plug-in, or from the command line. Developing with Eclipse is the preferred method because we can directly search for the tools we need while developing applications. Now let's talk about the installation of the Android application development tools

## CONCLUSION:

As interest in mobile applications grows, mobile application development has become a complex process. The software development process of the developed applications is of great importance. In order to control these processes and get the best results, it is necessary to explain the application development stages in detail. The vast majority of studies in this field give the results of the operation of software development processes. The lack of studies describing how these applications are developed is noteworthy. However, it is known that the development of mobile application software is weak and the accepted statements about the progress of mobile applications are not enough. It is necessary to draw attention to the fact that there is still shortage in the research methods and at the same time to determine the concerns and difficulties that may arise in the mobile application development process. Because software development usually brings abstract suggestions, it is necessary to reflect the development process of the software as it is.

**INTRODUCTION:**

International Tech Park, Chennai (ITPC) or ASCENDAS (as it is popularly known) is a hi-tech park in Taramani, Chennai. ITPC is a joint venture between Tamil Nadu Industrial Development Corporation (TIDCO) and Ascendas. The International Tech Park, Chennai (ITPC) is India's latest hip IT Park address for the IT and ITES industries. Located at the start of Chennai's IT Corridor, ITPC is the choice location for quality business space, reliable solutions and an international

business lifestyle second to none. These advantages are conveniently packaged by Ascendas, Asia's best IT park brand behind successful IT parks in India, China and Singapore.

#### Concept Discussed:

1. Applied Machine learning in Healthcare
2. Neural Network
3. Application Development lifecycle

#### Applied Machine Learning in Healthcare

Machine learning lends itself to some processes better than others. Algorithms can provide immediate benefit to disciplines with processes that are reproducible or standardized. Also, those with large image datasets, such as radiology, cardiology, and pathology, are strong candidates. Machine learning can be trained to look at images, identify abnormalities, and point to areas that need attention, thus improving the accuracy of all these processes. Long term, machine learning will benefit the family practitioner or internist at the bedside. Machine learning can offer an objective opinion to improve efficiency, reliability, and accuracy.

#### Neural Networks

The Neural Networks are best at identifying patterns or trends in data and they are well suited for predicting or forecasting. Hence neural networks are extensively applied to biomedical systems. An analysis is carried out to motivate neural network applications in medical diagnosis. Networks in the medical world, particularly diagnosis of various diseases. Technical concepts like MLP,

Pudukottai (DD) - 613 203.

K. S. 18/12/19

SVM, RBF, CANFIS, TLRN, PCA, SOM, and SNNS are applied for diagnosing various diseases using neural networks.

#### Application Development lifecycle :

Application development life-cycle, is a process for planning, creating, testing, and deploying an information system. The systems development life cycle concept applies to a range of hardware and software configurations, as a system can be composed of hardware only, software only, or a combination of both. There are usually six stages in this cycle: requirement analysis, design, development and testing, implementation, documentation, and evaluation.

RESOURCE PERSONS:

MR.S.RAJESH, MR R.BALAJI.

Market Simplified is a Leader in crafting mobile solutions for financial services institutions across the globes .The company was found 2005.The move from just 'Connecting the Channels' to 'Engineering Experiences' is clearly becoming the way to the future. It specializes in making financial institutions fully mobile by developing rich, customized applications for the financial industry, natively built across multiple mobile OS. Its core proposition includes coverage across mobile, tablet devices, web, Internet TV and other systems to stay ahead of the technology evolution.

## INTRODUCTION

Our Work aimed at designing and implementing an automated system that will alleviate the problem of handling patients" data in a hospital. The researchers were motivated to embark on this project because of the inherent problems of the manual system of hospitals file management. our manual system has so many problems associated with it such as insecurity of files, poor file retrieval system and inefficient file update system etc. our Work examines an existing information system of a hospital and designed an automated system that can help Medical Doctors and those who handle hospitals" data to perform their work more effectively and efficiently. It would provide easy and fast access to stored data as needed by different users with security against unauthorized access. Any authorized user can add, delete and update data into the database base on their user-assigned-role. It would equally have the facility to give a unique identity for every persons and stores the details of every patient and the staff automatically. It includes a search facility to know the current status of each room in the hospital. A user can search availability of doctors and the details of a patient using the system. The interface is very user- friendly. Proposed system The use of stem cells is a relatively new technological advancement in medicine, and is a heavily debated topic world-wide. The purpose of this project was to investigate this topic, especially key debated points to make recommendations and opinions. The findings and discussions of this project are based on a

18/12/19

variety of sources, and help clarify some common misperceptions. we developed an analysis pipeline which can automatically process images of stem cell colonies in optical microscopy. The question we try to address is to find out the statistically significant preferred locations of the marked cells. Most Android apps will need to persist user data at sometime. There are different ways to store user data, but SQLite databases are a very convenient and speedy method of saving user (or app) data and information.

More often than not, we deem the ideas that strike us as ingenious and amazing. However even though these ideas are brilliant, they may not necessarily be filling a need gap or addressing a pain point. An idea can only be converted into a successful mobile application if it solves a genuine problem of the target audience who will eventually download and use the app. Therefore, the idea has to be feasible, and the feasibility of the idea can be determined by conducting market research, performing a competitors' analysis, and establishing well-defined goals and objectives within a timeline. Now that you have your target group, your budget, your features, and your timeline figured out, it's time to actually start working on the conceptualization and visualization of the functionality of the app and its user interface. There are various ways to go about the design phase of the mobile app development process.

Storyboarding would involve visually chalking out your user's journey as they navigate through your app and explore different features. Some things to remember while story boarding are:  
Visualising the exact layout of every screen in the app and placing every element, including banners, buttons, and icons, in the right place.

S. S. 18/12/19

M.O.D of Computer Science & Engineering  
KINGS COLLEGE OF ENGINEERING  
Pondicherry, Gandhinagar (TN)  
Puducherry (IN) - 605 003.

K. S. 18/12/19

It is always good to have a unique UI as long as you are mindful about ensuring that the user's experience is not compromised.

The screens of your app should always align with its primary objective. Your user should not feel lost while using your app. Experiment with the layout of your screen. See if changing the size of a button, or the placement of an icon makes it better aesthetically and functionally.

Once you have finalized the features and the look and feel, the next step is to get down to the technicalities. You will have to zero in on the APIs you need, whether you need push notification services, what kind of analytics tools, user engagement platforms, and database types will you need, and so on. At this point, you will also be able to determine whether you need to build your app from scratch or you can use an existing app's architecture to base your app on. The final stage of the design phase is building a prototype. This allows you to check whether your app is living up to its functionalities and also get it tested by the various stakeholders involved in the mobile app development process. You can use multiple tools, including Marvel and InVision, to build a high-fidelity prototype that you can get tested for glitches and flaws in the UI/UX. Even though the prototype is barely a minimum viable product, it is important that it is built with the utmost care because the prototype will be the foundation on which the developers build your app.

While a lot of developers prefer building the app from the ground up all by themselves, there are still mobile app development platforms like Shop gate and Good Barber that can be used to build a fully functional prototype, to begin with. This is the point where you start setting up developer accounts on app stores where you plan on releasing the app. However, before that, the mobile app development process further consists of multiple phases, as follows:

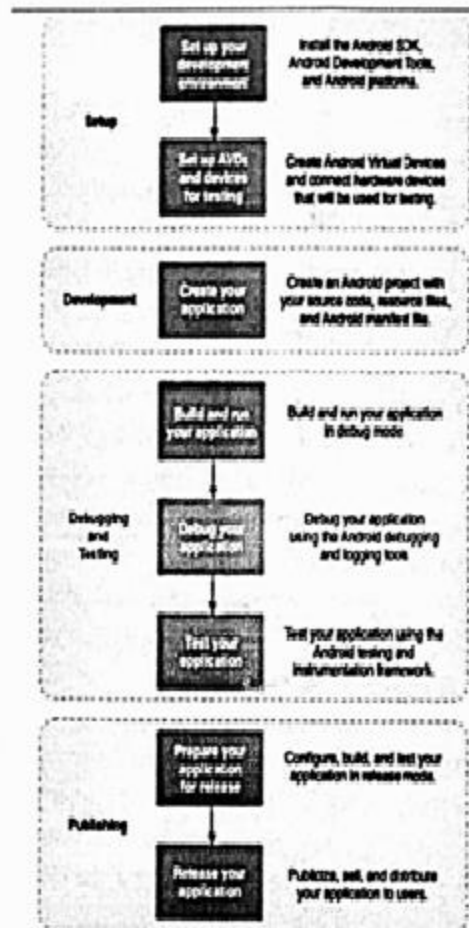

1. Alpha phase
2. Beta phase
3. Release phase.

No matter how seamless your mobile application appears to you, you can never have enough rounds of testing to ensure that it is failproof and ready for any user. Also, **mobile app testing** is something that you need to do early in the app development process because it becomes more expensive to fix glitches later once you're in too deep with the development. Ensure that you test out every feature in every phase because something that worked in the alpha phase may not work just as well in the release phase, and it's also important that you keep referring to the original planning documents for different cases of testing.

A successful launch does not imply that your app will see success on the whole. Post-launch monitoring, analytics, constantly updating the app for fixing bugs and crashes, social media listening, checking reviews and responding to them – all of these are important steps that follow through after the launch of an app.

## STEPS

**SETUP:** During this phase we install and set up our development environment. We also create Android Virtual Devices (AVDs) and connect hardware devices, on which we can install our Applications.

**DEVELOPMENT:** During this phase we set up and develop our Android project, which contains all of the source code and resource files for our application.

**DEBUGGING AND TESTING:** During this phase you build your project into a debuggable apk package(s) that you can install and run on the emulator or an Android-powered device.

**PUBLISHING:** During this phase we configure and build our application for release and distribute our application to users.

## TOOLS

Java, Eclipse platform, Android ADT and Android SDK are available from the most basic programming languages for mobile application development on Android operating system. These systems have a nice interface and smooth operation. These applications provide a great user experience. In addition to being popular with the Android operating system, applications based on the Android SDK are also attracting more attention. In this work, a number of tools were used in Eclipse when developing applications for Android. First, a number of tools were used in the Android SDK. After downloading and installing the SDK, these tools are accessed directly from the Eclipse IDE, through the ADT plug-in, or from the command line. Developing with Eclipse is the preferred method because we can directly search for the tools we need while developing applications. Now let's talk about the installation of the Android application development tools

## CONCLUSION

As interest in mobile applications grows, mobile application development has become a complex process. The software development process of the developed applications is of great importance. In order to control these processes and get the best results, it is necessary to explain the application development stages in detail. The vast majority of studies in this field give the results of the operation of software development processes. The lack of studies describing how these applications are developed is noteworthy. However, it is known that the development of mobile application software is weak and the accepted statements about the progress of mobile applications are not enough. It is necessary to draw attention to the fact that there is still shortage in the research methods and at the same time to determine the concerns and difficulties that may arise in the mobile application development process. Because software development usually brings abstract suggestions, it is necessary to reflect the development process of the software as it is.

# FOREST FIRE DETECTION SYSTEM USING "INTERNET OF THINGS"

PROJECT GUIDE : M&R.SANGEETHA, AssProf, CSE

R.VIDHYADAR,S.ARAVINDH,M.SAMBATHKUMAR

தமிழ்நாடு அரசு  
வனத்துறை

GOVERNMENT OF TAMIL NADU  
FOREST DEPARTMENT

DISTRICT FOREST OFFICE, THANJAVUR DIVISION, PILLAIYARPATTI FOREST,

TRICHY ROAD, THANJAVUR-613 403

RESOURCE PERSON :

MR.M.P.MOHAN

The Tamil Nadu Forest has completed a journey of more than 160 years, since the formation of the Department in 1856, during the last sixteen decades Forest Department had witnessed many transformations. In thanjavur district forest has 3,415 general forest, 328 moderate dense forest.

## INTRODUCTION :

Our Work aimed at designing and implementing an Forest Fire Detection System using "IOT". Wildfire is an uncontrolled fire which cause significant damage to natural and human resources. Once the fire starts ignited it rapidly spreads all over the forest and results in massive destruction. Some of the reason for wildfire are lightning, extreme hot and arid weather, severe drought, and human unawareness. Over the past decade there is a enormous destruction in forest, in which the majority of those accidents were caused by forest fire. Based on the Forest Survey of India's data on forest fire it is stated that around 50% of the forest areas as fire prone. Based on the forest inventory records, 54.40% of forests in India are exposed to occasional fires, 7.49% to moderately frequent fires and 2.405 to high incidence levels while 35.71% of India's forests have not yet been exposed to fires of any real significance. Between January 1, 2019, and February 26, 2019, a count of 558 forest fire occurred in India. This incidents shows that forest do not have proper fire prevention system. Now also Amazon forest heavily affected by forest fire .

IOT Infrastructure for forest fire detection system to help detect fire as soon as possible, before the fire spread over the large area. The system will be integrated with several sensors to detect fire and motion.

K. S. S. S.  
18/12/19

The device will be placed on proper places after doing surveys. The data collected by sensors will be sent to Raspberry pi placed on various places. Then the system will process the data and at the same time the station with the location of the fire using GPS module. Several types of sensors used in the system are Humidity sensor, pir sensor a flame sensor.

The system will use several sensors to detect any symptoms of fire. The sensors In this project, we designed an IOT Infrastructure for forest fire detection system to help detect fire as soon as possible, before the fire spread over the large area. The system will be integrated with several sensors to detect fire and motion. The device will be placed on proper places after doing surveys. The data collected by sensors will be sent to Raspberry pi placed on various places. Then the system will process the data and at the same time the will be placed on proper places after doing surveys.

After choosing the best places for placing the sensors, the sensor will be activated. The data collected by sensors will be sent to Arduino microcontrollers placed on various places. The microcontroller will then process the data.

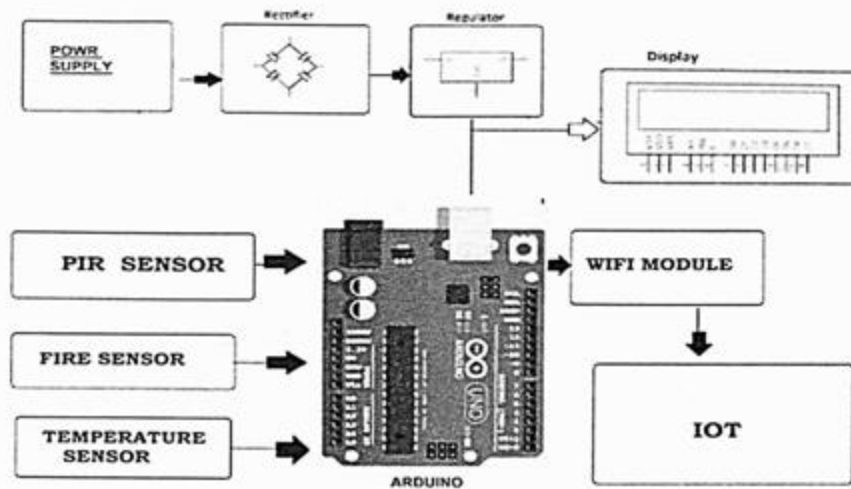

At the same time the system will send SMS using GSM module to the nearby fire service station informing them of the incident. The system will also inform the location of the fire to the administrator using GPS module. Several types of sensors will be used, for example, temperature sensor, gas sensor, smoke sensor, flame sensor, etc

*S. J. 18/12/19*

M.D of Computer Science & Engineering  
NINGS COLLEGE OF ENGINEERING  
Panveluram, Gandiyakottai (TN)  
Pudukottai (DI) - 613 303.

*K. S. 18/12/19*

### STEPS :

- **SETUP** : During this phase Configure the Programmable Devices ,Setting up code in Raspberry Pi.
- **DEVELOPEMENT** : Integrating the sensor module, Connecting the SIM900A GSM module with Raspberry Pi.
- **TESTING** : Powering up all the devices

### TOOLS :

The proposed system consist of two modules viz. IoT sensor node and web application deployed in the central location. The IoT sensor node is designed and integrated with Raspberry Pi. Here all the sensors are integrated with the Raspberry Pi. The proposed architecture of Forest fire detection .The various steps of proposed work are explained in this subsection.

The first step of forest fire detection is, before the fire starts ignited it monitor the temperature level of the battery and the sensors integrated in the Raspberry pi such as Temperature sensor, Smoke sensor, Fire sensor, Rain sensor. If there is any raise in temperature or it reaches above the threshold value it push the notification SMS to the forest department. Simultaneously it can be detected by using the various sensors such as rain, fire, smoke. If there are any such natural calamities like lightening, burning waste material sensors integrated in the Raspberry PI detects and sends signal to the Wi Fi inbuilt shield of GSM modem. The signals from the Raspberry PI are not directly send to the GSM modem it converts into Analog to Digital and then it sends into the GSM modem from which the signals are processed.

*K. S. S.*  
18/12/19

## CONCLUSION :

Forest Fire Detection which overcomes the limitation of the Existing technologies of Forest Fire Detection. In this work, we have developed a system which can reduce catastrophic events caused due to fire. This system detects the Wildfire as early as possible before the fire spreads over a large area and prevents poaching

In future, we will be updating the system with additional features like increase the range of sensing of the sensor, monitoring the count of animals present in the forest and can be prevented from being endangered.

## Objectives of the Industrial Visit

- 1) To learn about Transformer , parts of the transformer and how it works.
- 2) To learn the power transmission from power transformer to distribution transformer
- 3) To identify the parameters of the transformer and its optimal working conditions.

## Introduction

The Electrical substation at ullikottai was established in 1990. Distribution substations are connected to the transmission system and lower the transmission voltage to medium voltage ranging between 2 kV and 35 kV with the use of transformers.

The purpose of a substation is to 'step down' high voltage electricity from the transmission system to lower voltage electricity so it can be easily supplied to homes and businesses through distribution lines in nearby areas.

Primary distribution lines carry this medium voltage power to distribution transformers located near the customer's premises. Distribution transformers again lower the voltage to the utilization voltage used by lighting, industrial equipment or household appliances. Often several customers are supplied from one transformer through secondary distribution lines. Commercial and residential customers are connected to the secondary distribution lines through service drops.

## Transformers and its parts

Transformers are used to transfer electrical energy from one circuit to another through electromagnetic induction. They are used either to step up or step down voltage levels. A transformer is made of several different parts that function in their own different ways to enhance the overall functioning of a transformer.

## Parts of a Transformer

- 1) core,
- 2) windings,
- 3) Insulating materials,
- 4) transformer oil,
- 5) tap changer,
- 6) conservator,

S J 18/12/19

K. S. Sree  
18/12/19

- 7) breather,
- 8) cooling tubes,
- 9) Explosion vent

### Working of Transformer

Primary and Secondary Terminations are provided on Transformers as follows:

No lugs-lead type connection on:

- 0-25 KVA single phase
- 0-15 KVA three phase
- Bus-bar terminations (drilled to NEMA standards)
- 37 1/2-250 KVA single phase
- 25-500 KVA three phase

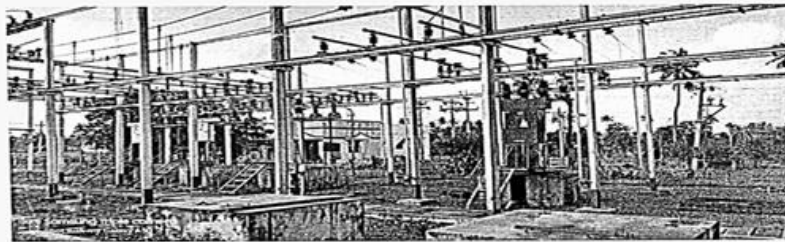

*S J 18/12/19*

HOD of Computer Science & Engineering  
KINGS COLLEGE OF ENGINEERING  
Panakkulam, Gandarvakottai (Tk)  
Pudukottai (Dt) - 613 303.

*K. Adarsh*  
18/12/19

### Efficiency

- 40 deg. C (104 deg. F) - 100%
- 50 deg. C (122 deg. F) - 92%
- 60 deg. C (140 deg. F) - 84%

Transformers step down transmission voltages, 35 kV or more, down to primary distribution voltages. These are medium voltage circuits, usually 600-35,000 V.

### Conclusion

Thus we have learned about transformer , parts of the transformer and also it's operation. Our resource person shared many relevant information about the transformer. The trip is highly informative and useful.

Our resource person explained about the necessity of electricity and its conservation. Thus the Industrial visit to Power station at Ullikkottai is very helpful for development of our project.

### ACADEMIC YEAR 2019-2020 FIELD VISIT CERTIFICATES

REG NO : 2009/11/021/00452

Office: 47 New Housing Unit, Thanjavur-5

DATE: 16/12/2019

#### FIELD VISIT CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

This to certify that Mr.S.PARTHIBAN Student of Kings College of Punakulam , Thanjavur. Has visited our Embedded and IOT laboratory on 16/12/2019 and 17/12/2019 regarding their final year project of **IMPLEMENTATION OF BATTERY MONITORING SYSTEM AND SMART CHARGING STATIONS USING IoT FOR ELECTRICAL VEHICLE**. The student was Interacted with our esteemed organization.

AMIRTHA GANESHK

Director,

ARMADA INDUSTRIAL AUTOMATION.

REG NO : 2009/11/021/00452

Office: 47 New Housing Unit, Thanjavur-5

DATE: 17/12/2019

#### FIELD VISIT CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

This to certify that Mr.J. MOHAMED KALIFA Student of Kings College of Punakulam , Thanjavur. Has visited our Sensors and Controllers on 16/12/2019 and 17/12/2019 regarding their final year project of **AUTOMATIC FISH FEEDER USING AN INTELLIGENT FEEDING CONTROLLER**. The student was Interacted with our esteemed organization.

AMIRTHA GANESHK

Director,

ARMADA INDUSTRIAL AUTOMATION.

REG NO : 2009/11/021/00452

Office: 47 New Housing Unit, Thanjavur-5

DATE: 17/12/2019

#### FIELD VISIT CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

This to certify that Mr.M. JAI SAI RAM Student of Kings College of Punakulam , Thanjavur. Has visited our Sensors and Controllers on 16/12/2019 and 17/12/2019 regarding their final year project of **AUTOMATIC FISH FEEDER USING AN INTELLIGENT FEEDING CONTROLLER**. The student was Interacted with our esteemed organization.

AMIRTHA GANESHK

Director,

ARMADA INDUSTRIAL AUTOMATION.

DATE: 29/12/2019

#### FIELD VISIT CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

This to certify that Mr. A.PAVITHRAN Student of Kings College of Punakulam , Thanjavur. Has visited our Embedded and IOT laboratory on 28/12/2019 and 29/12/2019 regarding their final year project of **IMPLEMENTATION OF GSM BASED CONTROLL AND MONITORING OF SUBSTATION**. The student was Interacted with our esteemed organization.

SHANMUGARAJA.K M.Tech. MBA, MSY, Ph.D.

Director,

SCION RESEARCH & DEVELOPMENT.

**CERTIFICATE OF COMPLETION**

This is to certify that A. Anantha Padma Pragas  
has done implant training in **Android App Development**  
from 10.06.2019 to 13.06.2019.

During the training period the performance of  
the trainee was found to be Good.

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING  
ACADEMIC YEAR 2018-2019/EVEN SEMESTER**

**INDUSTRIAL VISIT REPORT-BSNL**

An industrial visit to BSNL was scheduled for 4th semester students of Computer science and Engineering Department on 03/04/19. Total of 50 students attended the visit. They were divided into two batches of 25 and 25 students. Sub divisional engineer Mr. T. Sivasankaran divided the students into two groups and each group were thought about Overview of Digital Communication, Networking concepts and Internet Technology. Students learnt on practical aspects of call making and receiving. They were thought on how to create the calling number and how to check the dial tone. Students were briefed about Internet Technology and its uses, advantages, applications. The students were shown the real cables and its working procedure. The students were shown the functioning parts of distribution unit.

A telephone exchange consists of 3 functional blocks:

- 1) SWITCH ROOMS
- 2) MDF (Main Distribution Frames)
- 3) TRANSMISSION ROOMS

**1) SWITCH ROOMS:**

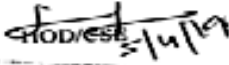

- a) It consists of digital electronic switches which guides the user to the destination by identifying a physical communication path.
- b) This identification is done with the help of logical or directory numbers.
- c) We were shown, how the switches work in real time, with an operating terminal.

**2) MDF (MAIN DISTRIBUTION FRAME)**

- a) All subscriber lines are terminated at the end of MDF.
- b) It consists of front (line) end and a back (switch) end which are interconnected with the help of a jumper.
- c) A safety point is created in MDF to avoid any damages caused due to faults at the customer end. The jumper of an MDF consists of gas discharge tubes which eliminates the faults.

Puduchottai (TN) - 613 365.

### 3) TRANSMISSION ROOMS:

- a) The main function of transmission rooms is the interconnection of 2 exchanges within or outside the town. It involves optical fibre communication.
- b) Voice signals are first identified, 30 voice channels are combined with the help of first order European multiplexers which can handle a speed of 2.048Mbps.
- c) Pulse Code Modulation of voice signals are carried out along with digitization. Voice signals of frequency 0-4 KHz are converted to 64Kbps. The industrial visit was very helpful in providing us a better understanding of the theoretical concepts of the subject Digital Switching Systems.

### ACADEMIC YEAR 2018-2019

### FIELD VISIT CERTIFICATE

**Delta Pavers**

100/2, Madhavadas Express Road, Tharjapur,  
Tamil Nadu, India 613 005

#### PROJECT FIELD VISIT

This is to certify that **R.ASWINI, D.DHIVYAPRIYA, M.R.HUMAIRA JASIM, B.MADHUMATHI** has done their field visit in our concern. We found those character during the period of his association with us was good. They have been sincere throughout his work.

**Field of Visit** - Paver block manufacturing

**Date** - 28<sup>th</sup> Jan 2019

We wish all the very best for your future endeavors.

With Regards

*N. Ganesan*

**DELTA PAVERS AND TILES**  
Paver and Tiles manufacturing  
Mathakottai, Tharjapur

# FIELD VISIT REPORT

**BATCH NUMBER : 05**

**BATCH MEMBERS :** K. ANUSHA – 821115104006

M. KRITHIKA – 821115104022

B. MEIMOZHI – 821115104025

**PROJECT TITLE :**

“SPEECH STRESS ANALYSIS BASED LIVE DETECTING SOFTWARE”.

**DATE OF VISIT :** 18<sup>TH</sup> JANUARY 2019.

**ADDRESS OF THE PLACE :** “EAST GATE POLICE STATION”,

SUNDARAM PILLAI NAGAR,

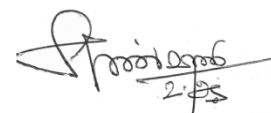

THANJAVUR, TAMILNADU – 613 001.

**ABOUT THE VISIT:**

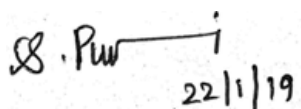

We three of our project members went to the East Gate Police Station and met Mrs.S.Selvarani to gain some knowledge about the investigations in the real time as how they deal with the various cases and how they find the truth and lie in a case, in the real time. We all learnt many things there, regarding our project with the help of Mrs.S.Selvarani mam and its was a great real time experience.

## **KINGS COLLEGE OF ENGINEERING**

**PUNALKULAM,PUDUKOTTAI-613303**

**BATCH NO:06**

**TEAM MEMBER:** A.ATCHAYA,S.MIRUNALINI,B.RAJAVARSHINI

**TITLE:**

DATA TRANSFER BETWEEN TWO SYSTEM OVER INTRANET  
USING "QUANTUM MECHANISM"

**DATE OF VISIT:** 19-01-2019

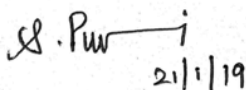

**NOTES:**

WE,S.MIRUNALINI ,A.ATCHAYA,B.RAJAVARSHINI HAVE  
VISITED MANNTT CONSULTENCY IN ALANTHOOR  
CHENNAI,REGARDING TO OUR PROJECT WORK ON  
NETWORKING.

THE DESIGN ELEMENTS FOR PROJECT ARE DISCUSSED  
AND SOFTWARE PROFESSIONALS IN THAT COMPANY GAVE  
CLEAR IDEA ON C#.NET,MS SQL SERVER .HOW TO IMPLEMENT  
AND UPLOADED BY USER. CLEARLY ABOUT HOW TO PROCESS IN  
NETWORK SECURITY.

## FIELD VISIT

**BATCH NO:**03

**NAME:** R.Abinaya-821115104003

**NAME :** P.Thenmozhi-821115104053

**NAME :** A.Vidhya-821115104055

**PROJECT GUIDE:** S.Rajarajan M.E.,

**PROJECT TITLE :** An intellegent solar LED street lightning system.

### OUTCOME:

We 3 in our project member gone to the municipality office.

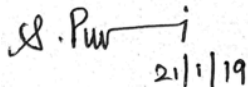

We gain some knowledge about current using automatic street light system and give lot of information about control panel of street light and they convey message to worker in real time.

We learn many thing regarding our project with under help of officer was a great current time experience

**DATE OF VISIT :** 19-01-2019

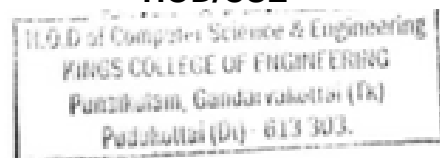

**PROJECT GUIDE'S SIGN**

**PROJECT COORDINATOR'S SIGN**

**HOD/CSE**

**REPORT**  
**INDUSTRIAL VISIT /FIELD VISIT**  
**KINGS COLLEGE OF ENGINEERING**  
**PUNALKULAM,PUDUKOTTAI - 613303**

**BATCH NUMBER :02**

**TEAM MEMBERS :A.ABINAYA,U.ARSCHANA**

**PROJECT GUIDE :MR.R.SRIRAM KUMAR B.E.,M.Tech.**

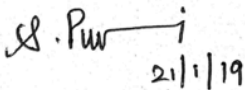

**PROJECT TITLE : Specific Features For Text Arrangement And Slide creation Approach.**

**DATE OF VISIT :December -3rd,4th,5th -2018**

We,A.Abinaya and U.Arschana have visited UNIQ TECHNOLOGIES in T.Nagar,Chennai,regarding to our project work on WEB MINING. The design element for our PpsGen project are discussed and the software professionals in that company gave clear idea on HTML,CSS, Java servlets, especially JAR file in Java to implement the SLIDE CREATION technique from dataset(pdf) uploaded by users. The Individuals in Uniq company guided us to take Internship in their company (if there is place for project leave in this academic year).

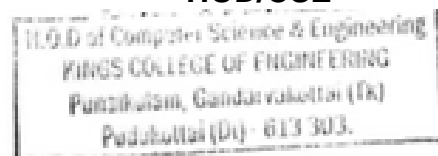

**PROJECT GUIDE'S SIGN**

**PROJECT COORDINATOR'S SIGN**

**HOD/CSE**

## FIELD VISIT

### KINGS COLLEGE OF ENGINEERING

**BATCH NO:**01

**NAME:**M.Aarthy-821115104001

R.Ananthi-821115104004

S.Buvaneshwari-821115104301

P.Sowmiya-821115104046

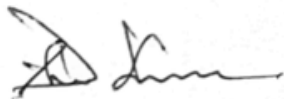

**PROJECT GUIDE:**Dr.D.Sivakumar.,M.E,Ph.D.

**PROJECT TITLE :**Smart Waste Management System Using IOT.

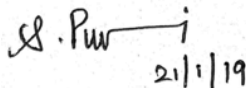

#### OUTCOME:

- \* We 4 in our project members gone to the municipality office.
- \* We gain some knowledge about wastage collection and now they convey message to workers in real time.
- \* We learn many things regarding our project with help of officer was a great real time experience.

**DATE OF VISIT:**18.01.2019

Vipoosh. v                              821115104056

Project Title: Enhanced Automated Toll collection

Date of visit: 16.01.19

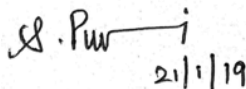

Outcome: We discussed both the advantages and disadvantages of the fastrack toll collection we had clear idea about the how we are going to implement our system.

We cleared doubts about the out for issuing tag. Even we discussed about what are the improvement that are currently made in the existing toll collection.

Handwritten signature of the Project Guide, dated 21/1/19.

Periyar Technology Business Incubator,  
Thanjavur - 611403

To,

Project Coordinator,  
IV Year EEE,  
Kings college of Engineering,  
Punalkulam, Thanjavur

Respected sir/Madam,

Sub: Student project work

This is to demonstrate that following students from your college, ensuring their work in **WOMEN SAFETY DEVICE WITH HIDDEN CAMERA DETECTOR**. This group visited our organization on 18/01/19 and we conversed about their project in brief. They are clarified their doubts. We expect best outcome from them.

**Students Details:**

SL. NO	NAME OF THE STUDENT	REGISTER NUMBER
1	S AKILANDESWARI	821115105003
2	P VICTORIYA	821115105046
3	EELAKKIYA	821115105011

HIG 47 New Housing Unit, Thanjavur - 5

Madam,

Here, I would like to appreciate your college students to participate in the field visit (Solar Power Plant – 15kWp) at our hospital. During the visit your students discipline was good.

Thanks & Regards

Manager (Dr.Babu ENT Clinic)

Pudukkottai - 613 303

Certificate No: PAN-665

## Certificate of Completion

This is to certify that Mr./Ms. SANDRU.K  
from KINGS COLLEGE OF ENGINEERING  
department of EEE has  
successfully completed the Internship program in  
TOT-APPLICATIONS USING RASPBERRY-PI

Duration : 12-06-18 to: 06-06-18

  
Technical Director

  
Branch Manager

# ARIGNAR ANNA SUGAR MILLS

AN ISO 9001:2008 CERTIFIED INDUSTRY  
(UNIT OF TAMIL NADU SUGAR CORPORATION LIMITED)  
(A Govt. of Tamil Nadu Undertaking)  
KURUNGULAM - 613 303, THANJAVUR.

17.04.2017

## TO WHOMSOEVER IT MAY CONCERN

This is to certify that, in-house training (14.04.2017 – 17.04.2017) at our organization in Assembly & Detailing of Condenser, Evaporator, and Power generation by III Year - B students were completed. During the course of training, the students conduct and character were found to be good. The in-house training completed students were,

1. R.RAMGOPAL
2. K.NIRMALRAJ
3. A.MURUGAN
4. A.KISHOREKUMAR
5. R.KARTHICKRAJA
6. R.MANIMARAN
7. R.MANIKANDAN

Ref: KCE / PRL / Industrial Visit/EEE II & III Year/ 17-18

23.02.2018

To  
The Chief Executive,  
Arignar Anna Sugar Mills,  
Kurungulam,  
Thanjavur District - 613303.

Dear Sir,

SUB: Requisition to grant permission for our II and III Year EEE students to visit your industry during first week of March 2018 - reg.

Kings College of Engineering (KCE) is an institution which was formed with the single aim of providing quality education to the poor and underprivileged students. KCE is approved by All India Council of Technical Education, New Delhi (AICTE) and is affiliated to Anna University, Chennai and accredited by NAAC. The institution was established in the year 2001 on a sprawling campus of around 60 acres on the Thanjavur-Pudukkottai Highway and run by Raj Educational Trust (RET). The institution offers five U.G and five P.G programmes and certified with ISO 9001:2008. The state of the art teaching methodologies are used to impart high quality education to the students including e-learning.

As a part of curriculum of Anna University and for the betterment and welfare of the young generation, the II and III Year EEE students (86 students) of our institution would like to visit your industry along with three faculty members during first week of March, 2018. Kindly consider our request and grant permission for one day to visit your factory on the above mentioned period.

Thank You.

Regards,

*T. Arputha Vijaya Selvi*
