Academic year 2020-21 (ODD)
Internal staff Webinar Report – Google Classroom

Date   : 15.09.2019 through Google Meet.

Google classroom usage was discussed with the staff members of Department of Electrical & Electronics Engineering on 15/09/2020. Some of the salient features of Google Classroom were discussed in the meeting.

1. Google Classroom is easy to use. Compared to other LMS (Learning Management Systems) that have been popular over the past decade, Google Classroom is amazingly simple.

2. Google Classroom helps to communicate more efficiently. Enter the email addresses of the students just once, and classroom communication is done. Just by entering the student in the classroom, the teacher has an email group, a discussion group, and a Google Calendar automatically created. And it's easy to add and remove students from the class as necessary.

3. Google Classroom helps you to communicate more effectively. Probably more important than being easy to use and efficient, the communication tools are also very effective. Because it is all Cloud-based, there is no more "losing" of assignments by students. If a student is absent, communication is seamless. Just last month, Google Classroom added a parent notification feature to keep parents informed about what is going on in the "classroom."

4. Google Classroom is more cost-effective and better for the environment. If every student has a device that connects to the Internet already, every sheet of paper that we save only makes the school more efficient and more environmentally responsible.
