

# AI FORGE CLUB

The Club serves as a premier innovation hub dedicated to mastering Artificial Intelligence and Machine Learning. It provides a collaborative space for students to transition from theoretical algorithms to building real-world intelligent systems. By integrating cutting-edge tools, the club empowers members to bridge the gap between academic research and industry-ready AI applications.

## Objectives:

-  To bridge the gap between academic learning and industry-driven AI applications.
-  To create an inclusive platform for students to learn, lead and collaborate.
-  To promote collaborative project development among the students.
-  To enable students to transform their innovative ideas into real-world intelligent solutions.
